-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are vague and indefinite. Note the last clause of claim 1 "a cradle is provided – the cradle is located --- between an upper surface of the cradle and a bottom surface of the piezoelectric diaphragm". Thus the cradle location is being defined relative to itself. Thus one cannot determine the metes and bounds of these claims.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1, 3-6 and 8-10 are rejected under 35 U.S.C. 102(a) as being anticipated by Takeshima (799).

Takeshima figs. 1 and 2 shows a rectangular piezoelectric diaphragm #1, a casing #10, a terminal #11 (fig. 3), first and second elastic adhesives (#13, #15) and a conductive adhesive (#14). The cradle is shown in fig. 4B. Regarding claims 3 and 4 note the materials used by Takehashi are the same disclosed by applicant (see e.g. col. 6, lines 6-31). Regarding claim 5, note the gap is not filled by adhesive in fig. 4B of Takehashi. The bimorph details of claims 7-10 are shown by Takehashi figs. 5 and 6.

Claims 2 and 6 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Further cited of interest are Takeshima (299), Kishimoto and Tgakeshima (762).
